</table>

**Optional courses (choice of n courses among all proposed)**

- Optional course 1
- Optional course 2
- Optional course n

**Final mark**: Average weighted by coefficients of the grades for compulsory and optional courses (coefficients correspond to ECTS credits)

### MODULE 2

**Practical part**: First Step Project

Final mark: Arithmetic average of the grades for the practical assessments

### Success conditions for modules 1 and 2

- Module 1: final mark ≥ 4,0 and no more than one grade under 4,0 in the compulsory and optional courses
- Module 2: final mark ≥ 4,0 and no more than one grade under 4,0

### MODULE 3

**Compulsory courses**

- Behaviour, Economics and Evolution Lecture Series
- Environmental Economics
- The Evolution of Cooperation: from Genes to Learning and Culture

**Optional courses (choice of n courses among all proposed)**

- Optional course 1
- Optional course 2
- Optional course n

**Compulsory and optional courses (evaluation by credit)**: each course is evaluated separately and credits are obtained if the final mark is ≥ 4,0

### Success conditions for module 3

Obtain at least 30 ECTS credits: 12 ECTS credits with compulsory interdisciplinary subjects and 18 ECTS credits with optional courses

### MODULE 4

**Master Thesis**

Written report / oral defence / practical research work

### Success conditions for module 4

Arithmetic average of three grades on the Master Thesis Project ≥ 4,0

According to the "Règlement d'études de la Maîtrise universitaire ès Sciences en comportement, évolution et conservation approuvé par la Direction de l'UNIL le 22 juin 2021".
